**Notice Regarding Establishment of New Logistics Site for Specialty Gases
in Kumamoto Prefecture**

The Nippon Sanso Holdings Group's Taiyo Nippon Sanso Corporation ("TNSC"; President: Kenji Nagata) announces that it has opened a business site and newly established a logistics site for specialty gases in Kikuyo-machi, Kikuchi-gun, Kumamoto Prefecture in order to strengthen its logistics functions for specialty gases in the Kyushu region.

TNSC manufactures and sells high-purity specialty gases used in semiconductor and LCD manufacturing processes for gas coating, etching, cleaning, etc.

Up until now, TNSC has supplied consumers across the entire Kyushu region with specialty gases from its logistics site in Kita-Kyushu City in the Kyushu region. However, due to the establishment of new plants and equipment increases by semiconductor-related companies centered around Kumamoto Prefecture in recent years, it was projected that demand for TNSC's specialty gases would grow significantly, so TNSC opened a business site in Kumamoto Prefecture, moved the logistics site and doubled the number of storage facilities for specialty gas containers in order to strengthen supply chains within its service area. The Kumamoto branch office, which had been located within Kumamoto City, was also transferred to the business site.

TNSC will contribute to the semiconductor industry and aim to expand its business and improve its corporate value by securely providing safe and high-quality specialty gases to semiconductor companies with strong demands.
