Notice Regarding Installation of Solar Power Generation System at the Tochigi Office

Taiyo Nippon Sanso Corporation (“TNSC,” President Kenji Nagata), a Japanese industrial gas company in Nippon Sanso Holdings Group, announced today that it has installed a self-consumption solar power generation system at its Tochigi office (Oyama City, Tochigi Prefecture) with the objective of providing green power for the office.

TNSC Tochigi office

1. Background to the Installation

With global warming causing frequent natural disasters, the TNSC Group is striving to reduce its impact on the environment in all business activities. Specifically, this involves promoting such things as the reduction of energy intensity in gas production plants, improvement of transportation efficiency of tank trucks used to transport gas, realization of energy conservation at business sites, and expansion of renewable energy use. In addition, TNSC aims to develop products that aid in conserving the environment, and by proposing these to the market, seeks to contribute to improving the global environment through its business activities.

As part of the Group’s initiatives, it has recently installed a solar power generation system owned by TNSC at its Tochigi office (Oyama City, Tochigi Prefecture).

2. Overview of Initiative

By installing solar panels with an output capacity of 49.4 kW on the rooftop of the Tochigi office, TNSC expects to reduce the electricity cost for the office while cutting CO2 emissions by up to 17 tons per year.

TNSC is working to introduce green electricity for use at its business sites, as well as in the offices of its affiliated companies, including through this installation. It will continue to promote initiatives to reduce indirect greenhouse gas emissions due to electricity consumption from areas that it can engage with in order to contribute to improving the global environment.

[Company Overview]

Taiyo Nippon Sanso Corporation

Business description: Manufacture and sale of various industrial gases such as oxygen, nitrogen, and argon, LP gas, gas for medical uses, and specialty gases, manufacture and sale of welding equipment and materials, gas-related devices, and, air separation equipment, assembly, processing, inspection of electrical components, and equipment maintenance

Established: October 30, 1910

Incorporated: February 4, 2020

Capital: 1.5 billion yen

Shareholder: Nippon Sanso Holdings Corporation (Investment ratio: 100%)

Revenue: 420.4 billion yen*
